

getConnected Project Application Form

OVERVIEW

The getConnected project results from a pilot project carried out by the Society in early-mid 2007. The aim of the project is to allow members with cerebral palsy access to the internet for email as well as the wealth of information and entertainment on the net. This ability will allow people to have an independent line of communication to the outside world as well as allowing the outside world a direct line to the individual.

For successful applicants the Society will fund the hardware required, ie PC, accessories and connection to the internet, as well as the initial setup fee for the Internet Service Provider. The Society will install and commission the equipment and provide starter training to the applicant. (The equipment will remain the property of the Society for 12 months after installation, after which, providing the terms of the agreement entered into have been fulfilled, the equipment becomes the property and responsibility of the user) The user will be required to fund the rental of the internet connection and internet usage. The ability of the user to be able to afford this element will be critical.
